### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

2. Authorization for this examiner's amendment was given in a telephone interview with Attorney Shirley Anderson (Reg. No. 57,763) on 3/23/07.

The claims have been amended as follows:

Claim 1. (Amended) In a telecommunication system via an advanced intelligent network (AIN), a method for blocking future calls from ~~one~~ two or more callers to a callee, the method comprising:

controlling a service switching point (SSP) and communicating with a terminal associated with the one or more callers and the callee;

receiving a first instruction from the callee to access a service to block future calls from a telephone number associated with a first caller to the callee, wherein the callee dials a special sequence comprising a combination of numerals, letters, and symbols;

providing at least one callee selection via a voice prompt responsive to the first instruction;

receiving a second instruction from the callee prior to an expiration of a predetermined time period, wherein the time period may be determined based on parameters for blocking future calls;

Art Unit: 2614

receiving and identifying the telephone number to block associated with the first caller, wherein identifying the telephone number comprises at least one of a reverse caller-ID technology or a reverse white pages look-up technology;

storing the telephone number to block associated with the first caller in a caller block table in a service data point (SDP);

playing a voice announcement to the callee that blocking future calls from the telephone associated with the first caller has been activated;

preventing, via the service switching point (SSP), one or more phone calls from the telephone number associated with the first caller from being forwarded to a second telephone number associated with the callee; and

playing a callee-selected message to the first caller of the telephone number to block when the first caller attempts to call the callee;

continuing with the service to block future calls, receiving a third instruction from the callee ~~to access the service to block future calls from a telephone number associated with a second caller; , wherein the callee dials the special sequence comprising the combination of numerals, letters, and symbols~~

providing at least one callee selection via the voice prompt responsive to the third instruction;

receiving a fourth instruction from the callee prior to the expiration of the predetermined time period, wherein the time period may be determined based on parameters for blocking future calls;

Art Unit: 2614

receiving and identifying the telephone number to block associated with the second caller, wherein identifying the telephone number associated with the second caller is provided by the callee;

storing the telephone number to block associated with the second caller in the caller block table;

playing a voice announcement to the callee that blocking future calls from the telephone number associated with the second caller has been activated; and

preventing, via the service switching point (SSP), one or more phone calls from the telephone number associated with the second caller from being forwarded to a second telephone number associated with the callee.

Claim 21. (Amended) In a telecommunication system via a telephone network, a method for blocking future calls from ~~one~~ two or more callers to a callee, the method comprising:

communicating with a terminal associated with one or more callers and the callee;

receiving a first instruction from the callee to access a service to block future calls from a telephone number associated with a first caller to the callee, wherein the callee dials a special sequence comprising a combination of numerals, letters, and symbols;

providing at least one callee selection via a voice prompt responsive to the first instruction;

Art Unit: 2614

sending a voice announcement to the callee if a second instruction is not received before a predetermined time period has expired, wherein the time period may be determined based on parameters to block future calls;

receiving and identifying the telephone number to block associated with the first caller, wherein identifying the telephone number comprises at least one of a reverse caller-ID technology or a reverse white pages look-up technology;

storing the telephone number to block associated with the first caller in a caller block table;

playing a voice announcement to the callee that blocking future calls has been activated;

preventing one or more phone calls from the telephone number associated with the first caller from being forwarded to a second telephone number associated with the callee;

continuing with the service to block future calls, receiving a third instruction from the callee to ~~access the service~~ to block future calls from a second telephone number associated with a second caller;

receiving and identifying the second telephone number to block is given by the callee;

and

storing the second telephone number to block given by the callee in the second caller block table; and

preventing one or more phone calls from the telephone number associated with the second caller from being forwarded to a second telephone number associated with the callee.
